

PHAWorks 5

PHAWorks® is a specialized tool for conducting Process Hazard Analysis (PHA) studies, such as HAZOP and What If studies. The software is designed to allow you to start conducting studies straight out of the box, leading you through each step of data entry. Within minutes, you can start documenting your PHA studies more quickly and efficiently while keeping the team focused on the task at hand. PHAWorks will not get in the way of conducting the study. It is a tool designed to help, not hinder, performing your PHA studies.

KEY BENEFITS

Conduct your PHA studies more quickly and efficiently.

Use a consistent framework to help improve the quality of your studies.

Choose from various PHA techniques to conduct your studies such as HAZOP, WHAT If, FMEA, PrHA, and Checklist.

Customize the software (add / delete / rename columns) for other uses.

Use Libraries of technical information to assist in the completion of your studies

Create custom reports in HTML, Word, Excel and PDF format.

Thousands of studies have been completed using PHAWorks by companies all over the world.

PHAWorks is a recognized and widely accepted tool for documenting PHAs.

PHA studies such as HAZOP and What If have become easier, quicker and more cost effective with PHAWorks.

LOPAWorks 3®

LOPAWorks allows users to conduct Layers of Protection Analysis (LOPA) for hazard scenarios. The software calculates scenario risks and compares them with risk tolerance criteria to determine what, if any, risk reduction is needed. Scenarios may be associated with hazardous events to facilitate compliance with the IEC 61511 / ISA 84 standards for Safety Instrumented Systems (SISs). Dominant contributors to scenario risk may be easily identified using the software. Overall facility risk estimates may also be determined to allow comparison with facility risk tolerance criteria.

Tracker 2™

Tracker is a fully integrated and automated application for tracking action items from conception to completion. It includes full email capability along with scheduled automated tasks such as reporting, sending emails and reminders, and archiving. Tracker is designed to simplify the workflow of tracking any type of action item that needs to be managed such as PHA and LOPA recommendations and audit findings. You can customize the software to meet your specific tracking requirements.

Specialists in Safety, Security and Risk

Consulting

Primatech provides industry-leading services to help companies meet their PSM and risk management objectives. Primatech utilizes expert consultants, innovative approaches, and unsurpassed standards for project work.

Training

Primatech is a leading provider of process safety training to companies in the U.S. and around the world, Primatech offers over 35 courses for open enrollment and private, on-site delivery. Primatech courses are widely known for being the most comprehensive available. Courses feature hands-on workshops, detailed resource materials, and expert instructors. Primatech is the recommended process safety training provider for many organizations.

Certification

Primatech Certification Services (PCS), founded by Primatech Inc. as an independent organization, provides recognition to process safety and risk management professionals who meet defined standards in specific technical areas. Currently, professionals can seek certification in process hazards analysis, layers of protection analysis and process safety auditing.

Software

Primatech's software products are proven tools to support your process safety, security and risk management programs. Currently, Primatech offers the software packages LOPAWorks®, PHAWorks®, and Tracker™.
