

Products

Primatech's software products are proven tools to support your process safety and risk management programs.

PHRAWorks® RA Edition

PHAWorks RA Edition is the next generation of PHA / LOPA software. It allows you to conduct both PHA and LOPA studies together in the same worksheet. PHAWorks RA Edition is versatile and easy to use. You can easily navigate within projects using the intuitive user interface, use quick start guides to lead you through performing studies, generate databases of linked entries to use in your study, create custom risk rankings using lookup or calculation methods, customize template files to use in future studies, plus use other software features to assist in performing your PHA / LOPA studies.

PHAWorks® 5

PHAWorks is a specialized tool for conducting PHA studies, such as HAZOP and What If. The software is designed to allow you to start conducting studies straight out of the box. Within minutes, you can start documenting your PHA studies more quickly and efficiently while keeping the team focused on the task at hand.

LOPAWorks® 3

LOPAWorks is a specialized tool for conducting LOPA studies. It calculates hazard scenario risks and compares them with risk tolerance criteria to determine if any risk reduction is needed. Scenarios may be associated with hazardous events to facilitate compliance with the IEC 61511 / ISA 84 standards for Safety Instrumented Systems (SISs).

Tracker™ 2

Tracker is a fully integrated and automated application for tracking action items from conception to completion. Tracker is designed to simplify the workflow for tracking any type of action item that needs to be managed such as PHA and LOPA recommendations and audit findings.

KEY BENEFITS OF PRIMATECH'S SOFTWARE PRODUCTS

- Designed by people who use the software as you do resulting in easy-to-use software with intuitive user interfaces.
- Rich in features and capabilities yet designed to allow novice users to master them quickly.
- Incorporate feedback from thousands of users throughout the world.
- Employ a consistent framework which makes it easy to use each product.
- Over 30 years' experience developing software products is factored into their design.
- Primatech provides excellent customer service and support.
