# Tracker 2

Tracker™ is a fully integrated and automated application for tracking action items from conception to completion. Tracker is designed to simplify the workflow for tracking any type of action item that needs to be managed such as PHA and LOPA recommendations and audit findings. Tracker provides exactly what many companies need - a reliable, consistent, automated, and integrated tool for tracking and managing action items to avoid overlooked, forgotten and improperly implemented actions.

KEY BENEFITS

- Automate tracking and managing action items
- Track action items from multiple sources in one tool
- Fully integrated email
- Schedule and automate emails, reminders and reports
- Escalate email reminders to three different levels
- Basic and advanced database search capabilities

- Create custom data fields
- Archive action items for future reference
- Create custom views of your data (filters, sort, group, columns, fields)
- Create custom tracking forms Generate custom reports
- Import action items from PHAWorks and CSV files
- Update PHAWorks projects with data from Tracker

Activity window displays data using a tree and form view
